Tomasz Wyszyński

With support of:

Prof. Patrycja Grzebyk
Dr. Ian Garner
Dr. Dominika Uczkiewicz

Purpose of the Conference

The Future of Central and East European Studies in the Light of Russia's War of Aggression Against Ukraine

Russian aggression against Ukraine has changed the view of the Russian Federation that had previously dominated politics and scholarship. At the same time, it has brought attention to the role and importance of the countries located in Central and Eastern Europe, as well as changing perceptions of these both in international affairs and in political and scientific discourses in the West. It has also had repercussions in the scientific field, where cooperation between Western research institutions and Russian academic units has been suspended and access to Russian archives has radically narrowed. Along with this, dominant interpretations are being reevaluated and gaps in current approaches to understanding phenomena in Russia and its history have begun to be noticed. One matter of urgency in the current situation is to move the West away from a Russian-centric view of Central and Eastern Europe in favor of other perspectives, including the experiences of the countries located there. What is needed are studies of Central and Eastern Europe that bring to the fore the histories of its member states, treated as entities independent of the Russian center. The above-mentioned factors, however, are not universal: Different views on Russia are also present in the so-called global south, and the dynamics in play since February 2022, like any other, are subject to temporal fluctuations. The aim of this conference will be to review the current state of affairs in the field of research on Central and Eastern Europe and on Russia, to reflect on the past, and to develop new approaches that can help decentralize perspectives and look for alternatives to the previously developed assumptions and models used to study this part of Europe.

Issues to which we would like to attach particular importance include:

- The politics of memory in Russia and the countries of Central and Eastern Europe
- The experience of World War II and communism in Central and Eastern Europe
- Russian imperialism and its influence on the history of Central and Eastern Europe
- Foreign policy of Central and Eastern European countries towards Russia now and in history
- The history and state of research on Central and Eastern Europe in the 20th and 21st centuries
- The history and state of research on Russia in the 20th and 21st centuries
- The current and historical political and social system of Russia – its characteristics and distinguishing features
- Russian political traditions and their influence on the shape of the state
- Legal classifications and settlements of Russian and Soviet actions against the countries of Central and Eastern Europe today and in history

Conference Partners

Davis Center for Russian and Eurasian Studies at Harvard University
 The Centre for East European Studies, University of Warsaw
 The Centre for Historical Research of the Polish Academy of Sciences in Berlin
 The Institute of Political Studies of the Polish Academy of Sciences
 The Tadeusz Manteuffel Institute of History, Polish Academy of Sciences
